NORTHERN BEECH

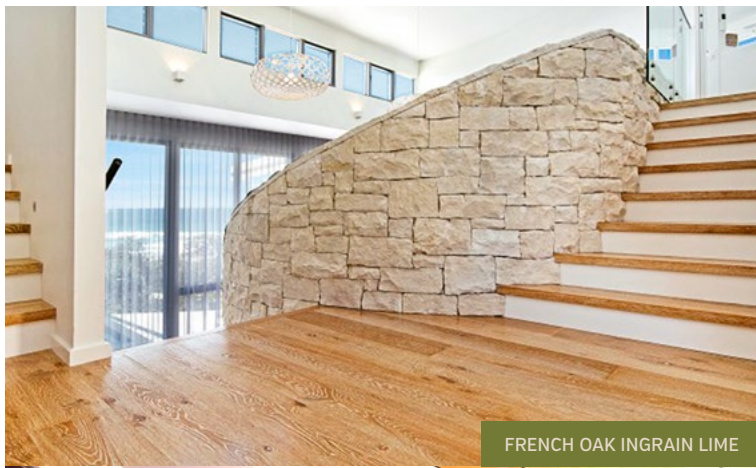

The timeless appeal of timber

Queensland Timber Flooring was founded by a passion for timber over 25 years ago. Today, we are one of the most experienced and respected timber flooring companies in Australasia.

Irrespective of whether you are an architect, builder or client, Queensland Timber Flooring is focussed on delivering the highest quality flooring products and finishes from conception to completion. We will always go the extra mile.

From large scale commercial projects to luxury abodes and project homes, our dedicated staff will ensure that your floor will be almost too good to walk on!

Queensland Timber Flooring supplies and installs a range of the highest quality Australian hardwoods, imported species and engineered flooring. We offer a comprehensive range to accommodate all designs and budgets. This has ensured our place as a leader in this specialised industry servicing Queensland and New South Wales.

Experienced craftsmanship

Queensland Timber Flooring joined the Australasian Timber Flooring Association (ATFA) in 2006 and is accredited at their highest level.

QTF pioneered the installation of timber flooring over concrete in Queensland, and many systems and procedures for installing timber flooring were developed by us and are now used by many flooring companies today. This establishes Queensland Timber Flooring as the most experienced in supply and installation of timber flooring.

Our craftsmen are some of the most experienced and talented in the industry whose pride in their trade demonstrates their commitment to quality.

Projects such as the Queensland Art Gallery, the new ABC Centre, Jupiters and the Treasury Casinos highlight the true craftsmanship of our people. We are trusted to supply and install on a large scale.

We back our work with a seven-year warranty on all materials and workmanship to provide you that extra level of confidence.

Premium products

Queensland Timber Flooring sources sustainably grown timber, supported by a full chain of custody certification process.

Predominantly two of Australia's oldest sawmills supply our native species such as Blackbutt, Spotted Gum, Brushbox and Ironbark. It is both the quality of this timber and the commitment of our sawmills to Industry Standards that give us the confidence to know that we are supplying our customers with the best quality materials.

Queensland Timber Flooring also offers exclusive access to other imported products, in particular solid and engineered French Oak. Our Brisbane warehouse stocks over 200,000 lineal metres of flooring which ensures that we are able to provide an efficient, cost effective service.

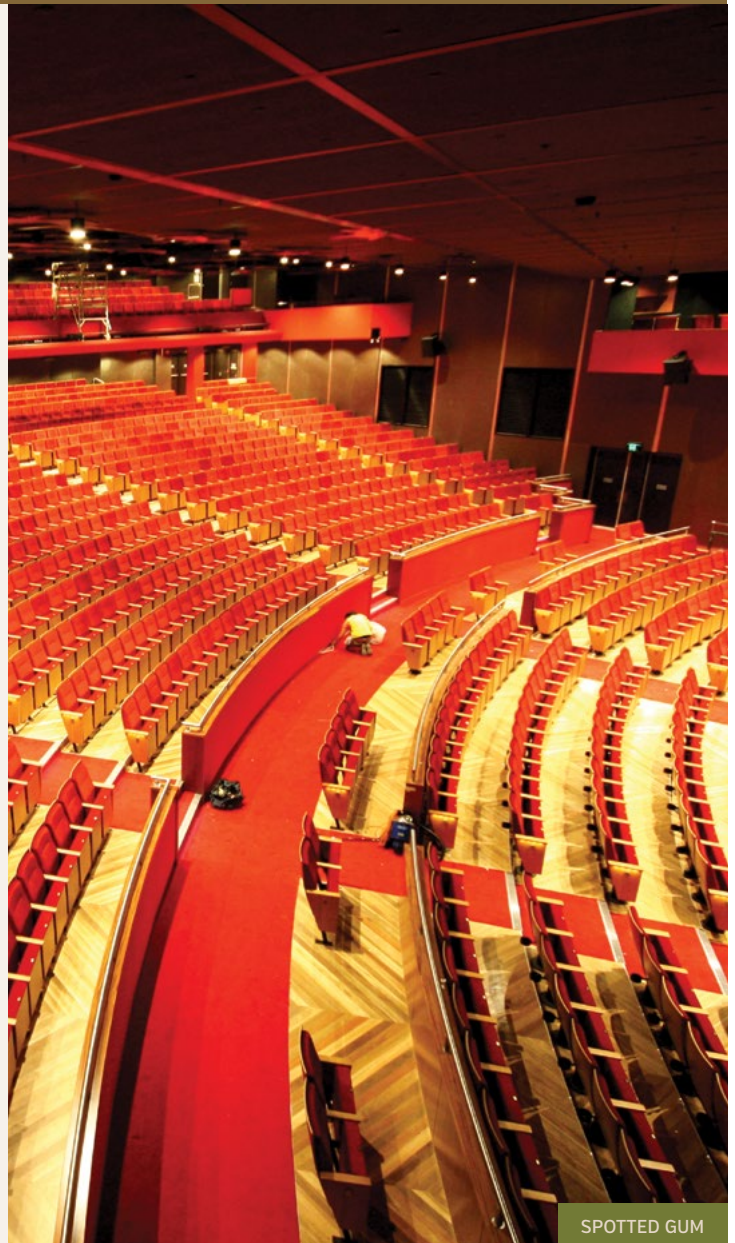

Outstanding service

SUPPLY AND INSTALL

We offer a conception-to-completion approach to flooring. Our experienced, friendly team can assist with your choice from our extensive range. You can visit our showroom or our unique mobile showroom is available to come to you. Once you have made your choice we can measure, quote and manage your installation.

SUPPLY ONLY

Just need beautiful timber for your project? You can trust us to get the best product at a competitive price.

A successful process

The process of selecting a timber floor is more complex than just picking the colour and texture that will suit your home or business. There are a number of technical aspects to the process that Queensland Timber Flooring can advise and assist you with.

The sections to the right are intended to give you an overview of the process, but the best way to make sure the process works most effectively for you is to call us to discuss and take advantage of our extensive experience!

1. PICK YOUR TIMBER

There are several questions to ask yourself to avoid getting overwhelmed when choosing your floor. Do you like light or dark coloured timber? Do you like wide or narrow boards? Do you like lots of character (gum veins) or a more uniform look? What is your budget? From this we can help you match your criteria.

2. KNOW YOUR SUB-FLOOR

We need to know the sub-floor you will be using as this will then dictate the fixing system that is most appropriate.

3. FIXING SYSTEM

Installation of timber to your sub-floor can be carried out in different ways. We shall advise which method is best suited for your particular project. This may include considerations of acoustics and floor heights.

4. SET YOUR TIMEFRAME

We recommend selecting your flooring early in the building or renovation process. This will ensure that it is supplied and installed at the appropriate time. Your builder will assist with the estimated timeframe and our project management team will keep in contact to ensure the job is kept on schedule.

“Thank you to the tradesman that completed the internal timber finish on one of our recent projects. Our clients selected a specialty finish that we had not used on previous projects and the team at Queensland Timber Flooring were very accommodating. Overall, a great result!”
