This premium wide board floor is elegant and distinctive giving an enhanced architectural result from a durable and high end engineered board. The Provence range also includes a traditional solid timber board as well as an engineered board in a raw state for custom onsite finishes. The range is also available in 450mm x 90mm parquetry.

Engineered to Perfection

The Provence range is the highest quality engineered board with a generous 6mm thick lamella of Oak on a strong stable tongue and groove substrate. This results in a wear layer similar in depth to solid timber but with the improved stability of a high end engineered product. The raw solid Oak version has an industry leading 10mm top layer.

Tone & Texture

The Hard Wax Oil finish on a wire brushed surface give Provence Oak a tactile texture that is warm and inviting and highlights the natural beauty of the oak. The Matt Oil finish gives a surface that is easy to care for and maintain. Our Hard Wax Oil is a premier floor finish developed and sourced in Germany.
